

**NORTHROP GRUMMAN**

DEFINING THE FUTURE™

©2008 Northrop Grumman Corporation

A person is sitting in a chair in the center of a large, curved room. The walls are covered in a grid of many small video screens, each displaying a different image. The floor is highly reflective, mirroring the screens and the person. The overall atmosphere is futuristic and high-tech.

**Total situational awareness.  
No matter where you are situated.**

**AESA.** The addition of Active Electronic Scanned Array technology is an upgrade of exponential proportions. The most significant single tactical improvement you can make to any warfighting platform, air, sea, or ground. AESA leverages networks, expanding capabilities in every electronic warfare realm. Northrop Grumman's unmatched AESA experience provides an entirely new grasp of the battle situation. And delivers the critical edge for victory.
