

A fighter jet is shown from a high-angle, front-quarter perspective, flying over a terrain of blue water and brown land. Numerous bright yellow lines radiate from the jet, representing radar or sensor beams. The jet's canopy is visible, showing a pilot. The overall scene is dynamic and high-tech.

NORTHROP GRUMMAN

DEFINING THE FUTURE™

© 2006 Northrop Grumman Corporation

The goal is to become battle-hardened before the battle ever starts. At Northrop Grumman, our electronic warfare (EW) simulation products are as vivid as the real thing. Specializing in RF and IR threat simulators, we enable pilots and shipboard operators to locate, identify and counter enemy missiles, employing the tactics they'll need to survive in actual combat. We also help the military test and evaluate new EW systems, as well as train EW systems operators. With over 30 years of leadership in this field, Northrop Grumman is able to offer full EW solutions at affordable prices. So, when the battle starts and the threats are real, there won't be any surprises.
