

***THE VALUE OF
RULING THE
SKY WITHOUT
COMPROMISE.***

Northrop Grumman's Scalable Agile Beam

Radar (SABR) knows no compromise. SABR

is the only flight-proven AESA designed

specifically for the F-16. It provides robust

situational awareness, power and cooling

advantages, low retrofit and sustainment

costs, a quick flight-line installation, and easy

integration of key fifth-generation fighter

modes and capabilities. As the F-16 radar

producer for 35 years, we know that anything

less than SABR is a compromised solution.

THE VALUE OF PERFORMANCE.
