

***THE VALUE OF
SPACE RADAR
TESTED IN SPACE,
NOT JUST
IN THEORY.***

With over 30 years of experience

in space radar technology,

Northrop Grumman Electronic Systems

offers proven, lower-risk space solutions.

We've supplied the sensors to many

of the most important space-based

missions, including the Defense Support

Program, Mars Rover, and Space-Based

Infrared System. And we're able to fully

leverage our extensive airborne and

ground AESA investments as well.

All of which explains why the

U.S. government relies on us to solve

their toughest space problems.

THE VALUE OF PERFORMANCE.

NORTHROP GRUMMAN
