## SureCAL Can Save You Money:

When you buy SureCAL software, you own it. Calibrate one or hundreds of units. Use your old or new standards. Buy test equipment from any major test equipment manufacturer. And don't forget SureCAL's team of metrology engineering is behind you, so call us often. Let us know what we can do to make your life easier. Mick Jagger said it. "You can't always get what you want But if you try sometimes, you just might find, that you get what you need!" Call us.

The RF Components Package is a popular bundle of 32 procedures to calibrate passive RF devices and accessories. You can even customize your own procedures.

Having problems deciding what new standards are necessary? Call us. We can help you get the most bang for your buck. We don't sell hardware. Like you, we use it. And just because the OEM says your old test equipment is obsolete doesn't mean it's obsolete to SureCAL. Waste not want not.

Multitasking. Our lab recently did a Six Sigma project on multitasking. With SureCAL software, and our new lab layout, one tech monitors several stations. This is possible by unattended automation that combines tests using the same hookup.

Speed Improvements. We are always working on test time improvements. Recently the 26.5 GHz PSA procedure was updated with the N5531S options, while total test time was reduced by about an hour. All updates and speed improvements are free with your annual Software Maintenance Service.

## NCSL

SureCAL will be exhibiting at the NCSL International Symposium and Workshops at Walt Disney World Swan & Dolphin in Orlando, Florida on August 3 through August 6. Please make time to stop by our exhibit booths 601, 603, 605 & 607 and see a demonstration of the new release 5.1 Test Manager. The 5.1 operating system will be featuring support for non-GPIB devices and improvements to our data access speed.
